## Renault unveils the Alaskan ICE Edition

**Geneva - March 6, 2019 -**

Renault Alaskan ICE Edition, in its glacier white colour, contrasts with black and red exterior strappings. Alaskan ICE Edition is equipped with an exclusive two-tone hard-top design to increase storage volume and protect the load, and black style side bars. Black 18" aluminum wheels, wing surrounds and off-road tires reinforce its imposing and robust design. Inside, the audio-focal system provides enhanced sound quality with 6 stereo Focal speakers.

Renault Alaskan still stands out for its muscular design, with an energetic front end and athletic lines, and its 2.3-litre Renault dCi engine, the most fuel-efficient and economical in its segment.
